

Web Team 2021-22 Annual Report

Submitted by Sandy Simon & Don Winsor

The Web Team had been responsible for the operation and overall organization of the uuaa.org web site since 1999. This changed this year as the site was reorganized by UUA staff members and moved to a WordPress platform by the company Elevation Web. A transition to the new site is to begin in May. The web team will be trained in how to maintain the site.

The web team also addresses technical issues, maintains uuaa.org mail accounts, listservs and uuaa.org forwarders, interfaces with our Internet Service Provider (currently UUism.net) and helps answer technology related questions. We provide “short links” such as “uuaa.org/service” and “uuaa.org/climate” to help make access to information easier. We have kept track of some of the UUA Google accounts (Board, Communications, Governance, etc) YouTube subscriptions. We no longer maintain the main UUA Facebook page.

Basically we do what we can to make communications go smoothly and keep information about UUA easy to access.

We continue to rotate “webtech” duty monthly and have been kept very busy with maintaining our listserv email lists and updating many parts of the website as more Vision information is generated and more staff and operations changes have occurred as we slowly come out of the pandemic.

We have are limping along with three dedicated volunteers, having lost 2 valued members over a year ago. Once the new website is in place and we know what is needed to maintain it, we need to recruit new members. Our current members are Don Winsor (chair), Tricia Mooney and Sandy Simon, retired member Connie Lippert still provides occasional input.
